Can I delete WorldCat holdings using Z39.50, or do I have to do a reclamation or a data sync of deleted holdings?

Last updated: Wed, 24 Jul 2019 20:10:10 GMT

Applies to
- WorldShare Collection Manager
- Z39.50 Cataloging

Answer
Z39.50 cataloging now supports the ability to delete WorldCat holdings.

However, you can still delete holdings through a data sync collection or reclamation for larger numbers of records. If you prefer to delete holdings in smaller batches, you can also use Connexion or Record Manager.
