What values does OCLC give for "reason for updated record"?

Last updated: Thu, 14 Jun 2018 20:09:01 GMT

Applies to

- WorldShare Collection Manager

Answer

OCLC gives the specific field which has changed and thus triggered an update record. For example, "Master record variable field() change: 505 and 650".

Additional Information

Reasons for updated records are listed in our help documentation.
