Why can't I delete my fund code?

Symptom

- User is unable to delete fund codes because the red circle icon with the minus sign that is used to delete the fund doesn't appear.

Applies to

- WorldShare Acquisitions

Resolution

If that fund has been used in any transactions, such as placed orders, receipt, or invoices it cannot be deleted. If you haven't used the fund yet, but you still don't see the delete button, check to see if it is used in any order templates. If it is, delete the fund from the template. That should make the button appear. If it does not, contact OCLC Support.
