TLS 1.0 no longer being supported

Last updated: Thu, 06 Feb 2020 21:06:09 GMT

Symptom

• User contacted us saying: TLS 1.0 is no longer being supported by my institution and when I deactivate it on my Web Server, the ILLiad Services for the Connection Manager and System Manager fail.

Applies to

• ILLiad

Resolution

Here is how you can set up TLS 1.2 support.

1. There is a registry key that can be overridden that will allow for TLS 1.2 support. You can read more about that here.
