Does HeinOnline support OpenURL linking at the article level?

 Applies to

- OCLC WorldCat knowledge base
- OpenURL article level linking

Answer

After a deeper review of this issue, OCLC has re-evaluated HeinOnline's platform and discovered that it does not support OpenURL linking at the article level. OCLC links are working as designed by taking the user to the volume that contains the issue and article in question. The user will need to scroll to the article from the navigation pane on HeinOnline's website. OCLC is still working with Paperity to have start pages added; however, the links will still resolve to the volume level for HeinOnline titles.
