How can I tell if our EBSCO collection is correctly set up to automatically load eBooks?

Last updated: Thu, 27 Feb 2020 19:32:52 GMT

Applies to

- WorldShare Collection Manager

Answer

To tell if your collection is automatically loading eBooks, you can look at the collection history.

**NOTE:** this information below ONLY pertains during setup and initial configuration. Once feed is in place this screen will change and you'll need to contact OCLC Support.

Navigate to Metadata > Collection Manager and, search for the collection. After selecting the collection, you can scroll down to history to view the actions that have been taking place on that collection. The **source** and the **action** field in the activity history will show you if this is on an automatic feed. They should contain the provider's name.

Additional information

Here is more information about how to see if your EBSCO collection loaded.
