Our holdings are attached to a record, but holdings do not display in WorldCat Discovery search results.

Last updated: Fri, 08 May 2020 20:56:11 GMT

Applies to

- WorldCat Discovery
- WorldCat knowledge base

Answer

Holdings added via the WorldCat knowledge base are set by a queue that can take 24-48 hours to complete. If you just selected a title in the WorldCat knowledge base this is the most likely reason the holding is not appearing.

If the holding does not appear within that time frame, the title may need to be re-indexed. Please contact OCLC Support. The support team will need to know your institution's OCLC symbol, and the OCLC number for the title.

Additional information

More on how the WorldCat knowledge base sets holdings is available. How to set holdings on titles using WorldShare Record Manager is also available.
