How to get and set up RDA with Connexion Client

Last updated: Mon, 07 Jan 2019 23:45:54 GMT

Applies to
• Connexion Client

Answer
1. The access for RDA has to come from RDA. They can be reached at their website.
2. Once you get a login and password from RDA you can then set up Connexion Client to use RDA tools when cataloging your records.
3. To set this up in Connexion Client go to: Tools > Options > RDA. Here you can set up how the RDA toolkit interfaces with Connexion Client and where you put in the username and password.
4. Now when you go to the Tools drop-down again in Connexion Client you should see the RDA Toolkit live and accessible at the bottom of the list.
