How to search for blank date in field 008, positions 7-10 (Date 1)

Last updated: Thu, 17 Jan 2019 14:45:20 GMT

Symptom

- I would like to run an OCLC search by subject heading su:<subject of choice> but qualify it by a blank date in field 008 positions 7 through 10 (Date 1).
  
  The goal is to limit my results to subjects that have no date entered in field 008/7-10.

Applies to

- Connexion client
- Connexion browser
- Record Manager

Resolution

For no date, enter zeroes — su:<subject of choice> AND yr:0000.

Additional information

Using 0000 for a no date (uuum) search as well as substituting zeros for the u’s are described briefly at this help page, near the bottom of the first column.
