Is there a suggestion on how I should configure data such as language codes?

Last updated: Mon, 25 Feb 2019 20:37:57 GMT

The Gateway will use the information in your metadata record's dc:language field to construct more precise MARC mappings. The Gateway will use the language information you supply in ISO 693-2,3 standard language tables and complete more of the language details in the resulting WorldCat.org record.
