Learn how to effectively browse WebDewey.

**Browse WebDewey**

1. On any screen, click **Browse**.
2. On the Browse WebDewey screen, enter a **term** in the form field.
3. Select the index to browse from the following indexes:
   - Dewey Numbers (with Captions) (default)
   - Relative Index
   - LCSH
   - MeSH
   - Sears
4. Click **Browse** or press <Enter>.

**Tips for effective browsing**

- Most search techniques (truncation, character masking, Boolean operators, grouping) cannot be used in browse queries. The browse term you enter is matched — character by character, from left to right — against the characters of the terms in the index.
- Browse to determine whether a subject term occurs in a WebDewey index.
- Browse to identify alternative terms for the desired subject that do occur in a WebDewey index.
