When I look at the ILLiad Update Scheduler, why does it have my Server Version as a higher version then my ILLiad Client?

Last updated: Thu, 07 Mar 2019 21:18:41 GMT

Applies to

- ILLiad.

Answer

The Server Version is related to the Version of the Update for the Server. It is always higher than the version of the ILLiad Client. So if you see a Server Version of 8.7.2.0 and your ILLiad Client is 8.7.0.0, then yes, you see the correct information in the Server Version. And your ILLiad Client is correct at 8.7.0.0.
