Is there a way to create a search box widget in Discovery that searches only print books in our collection?

Last updated: Thu, 11 Jun 2020 14:02:03 GMT

Applies to

- WorldCat Discovery

Answer

Yes, the search box can be used for limiting searching just print material. One of the filter parameters is format type. You would use the format "changedFacet=format&format=book". Here’s a list of all the different format types available to choose from.
