How can I check which version of ILLiad I am running?

Applies to

- ILLiad

Answer

1. Click the ILLiad button at the upper-left corner of the ILLiad Client window.

2. Click Options.

3. Click Resources.

4. The ILLiad client version is shown at the top of the window.

Another way is to use the Web Address for ILLiad by following these steps:

1. If your sign-in URL is https://123.abc.oclc.edu/ILLiad/logon.html, then you need the first part before the ILLiad which is:

   https://123.abc.oclc.edu/ILLiad

2. add on /illiad.dll?getversioninfo.

3. So the full URL becomes:

   https://123.abc.oclc.edu/ILLiad/illiad/dll?getversioninfo

You will now see all the ILLiad Version information for the different modules.
