How do I set it up in ILLiad so the Web pages pull the NVTGC options from the CustomDropDown table for my Registration page?

Last updated: Fri, 26 Jul 2019 14:40:33 GMT

Symptom

• You want one place to pull the information for the NVTGC so you do not have to keep on updating your Registration and Change User Information Web pages

Applies to

• ILLiad

Resolution

You will want to do the following to update your Web Pages and your Customization Manager:

1. You will use the CustomDropDown table to add the sites you want for NVTGC and then add the code:

```html
<label for="NVTGC">
    <span class="field">
        <select id="NVTGC" name="NVTGC" size="1" class="f-name">
            <option name="custom" groupname="NVTGC" selectedValue="" defaultValue="" defaultName=""/>
        </select>
    </span>
</label>
```

More information is found in the Custom DropDown documentation.

2. You will also want to go to the Customization Manager and edit your Notifications. You will want to copy the key for ILL Borrowing Article Delivery and then change the ILL to the NVTGC for the new site. So if the new site has an NVTGC of DOWN, then you change ILL to DOWN and save the Notification template. You will want to do the same for all of the ILL notifications which include: ILL Borrowing Article Delivery, ILL Borrowing Article Pickup, ILL Borrowing Loan Delivery, ILL Borrowing Loan Pickup, ILL Doc Del Article Delivery, ILL Doc Del Article Pickup, ILL Doc Del Loan Pickup.
Once you have copied them all over, then you should be able to use the new NVTGC.

Additional information
In addition to your Registration page, you will also need to update your ChangeUserInformation.html web page. There are several fields you can use this for such as Status or Department and so on.
