Export item records with availability

Last updated: Tue, 17 Sep 2019 16:05:07 GMT

Learn how to export the stockitem availability in Amlib. During the Marc Export process, it is now possible to export the Stockitem availability (e.g. if the item is on loan or available).

Set up the Marc Tag

1. Go to Main > Authorities > Marc Tags
2. Highlight the **945** tag and select **F7 SubF** button

![Marc Tags Within the System - STAFF at Chelsea Library](image)

3. Select **F1 New** and enter a new subfield for the availability. This example uses "f" but this may depend on what you are exporting the records for. Enter the availability subfield as below if it is not already set up

4. Select **F3 Update** and exit the window

### Set up the MarcItemDefs

1. Go to **Main > Authorities > Authorities**
2. Select **Application > MarcItemDefs**
3. Click on the **Export Items** tab
4. In our example we have set the availability to be exported in the “f” subfield of the 945 tag. Against the line Circ status for an item enter
   - **Tag number** – for example 945
   - **Subfield** – for example f
   - **Starting position** – 0
   - **Length** – 0
5. **F3 Update** then log out of Amlib and back in

Export Records

1. Export your records in the usual way, as per the Marc Export instructions
2. Marc records that have been exported will include the availability subfield.
