Open Access collections have Maintain WorldCat Holdings set to disabled as the default

Last updated: Wed, 30 Oct 2019 14:50:34 GMT

Applies to
WorldShare Collection Manager
WorldCat knowledge base

Answer
If you expand the Holdings and MARC records accordion in an unselected Open Access Collection, you can see that the Maintain WorldCat Holdings is set to "Disabled."

This is working as designed, a library will have to change this setting if they want WorldCat Holdings on Open Access Collections. The only exception is the Dumbarton Oaks Research Library and Collection, which appears to be set to maintain holdings at the collection level.
