How to construct your Open URL link in ILLiad?

Last updated: Tue, 05 Nov 2019 21:12:52 GMT

Applies to
When you want to setup Open URL with a Database

Answer
You will need to know your server address to start with. In most cases it will look like this:

https://servername/illiad/illiad.dll/OpenURL

For shared servers
https://servername/illiad/sitename/illiad.dll/OpenURL

This is all based upon your server being setup in the standard configuration.
