What is the proper procedure for decommissioning my ILLiad server when switching over to Tipasa?

Symptom

- How to decommission your ILLiad server after migrating to Tipasa

Applies to

- ILLiad

Resolution

Follow the steps to make sure that you have everything you need to have and then you can Decommission your server:

- Complete the instructions from the ILLiad Shutdown Procedures for a Self-Hosted Server page.
- Make sure you have any reports you need from the WebReports.
- Your patrons should have all the articles they need from the Web Server.
- You will now be able to decommission the server.
