We have a knowledge base collection of multi-volume ebooks. How can each volume be linked to the OCLC record for the title?

Applies to

- WorldShare Collection Manager

Answer

The volumes may be associated with each other by adding corresponding OCNs (OCLC numbers) to the OCN groupings within these WorldCat knowledge base titles, assuming if they aren't already present in the grouping. This will allow the WorldCat knowledge base links to appear in Worldcat Discovery as desired on related records for the multiple volume resources.
