Why isn't the audience filter displaying in WorldCat Discovery?

Last updated: Thu, 30 Jan 2020 14:40:42 GMT

Applies to

- WorldCat Discovery

Answer

In WorldCat Discovery, filters vary by database based on the metadata available. This means use of the “audience” filter is based on the databases included in a search, including searches done via Advanced Search. While “audience” is included in metadata for WorldCat and WorldCat.org, it is not available in all central index databases. WorldCat Discovery displays filters that work best across all databases being searched simultaneously.
