I need to add the Country field in the ILLiad Registration and ChangeUserInformation pages, how do I do this?

Last updated: Wed, 19 Feb 2020 21:07:33 GMT

Symptom

- You need the Country field added to your Registration and ChangeUserInformation pages

Applies to

- ILLiad

Resolution

You can add Country following the example of what have in State:

```html
<div class="form-group col-md-4">
    <label for="Country">
        Address Country
    </label>
    <span class="req">(required)</span>
    <select id="Country" name="State" size="1" class="custom-select mr-sm-2">
        <option name='custom' groupname='Country' selectedValue='@PARAM name='Country''>
    </select>
</div>
```

1. You also need to decide if you want to Require the field in the WebValidation table. If you do, follow the pattern you have for State.

2. The field is required in this example, you may not need to require it. If you do not you need to remove the line:

   ```html
   <span class="req">(required)</span>
   ```

3. You do not have to add an entry on the WebValidation table.
