Can I turn off circulation notifications in WorldShare?

Last updated: Fri, 03 Apr 2020 13:44:04 GMT

Applies to

• WorldShare Circulation

Answer

There is no on/off switch for circulation notifications in WorldShare; however, you can update the language that is included in the notification. Libraries can change the content of the start and/or end text in their Notification Policies. The content of a notification isn't generated until the moment that the email is sent.

For example, a library can update an overdue notification with start text like, "Please disregard this notification. You do not need to return overdue items while the library is closed." This will be included in every notification sent after the Notification Policy is updated.
