In which table is the information from the Imported Request tab pulling from in the ILLiad SQL Server?

Last updated: Thu, 13 Aug 2020 17:19:45 GMT

Symptom
- In which table is the information from the Imported Request tab pulling from in the ILLiad SQL Server?

Applies to
- ILLiad

Resolution
The information is stored in the database in the Request Text field of the LendingRequests table. The table has only two fields, TransactionNumber and RequestText.

Page ID
31633
