Can I add my library's holding codes to my printed labels?

Last updated: Mon, 09 Nov 2020 17:38:00 GMT

Applies to

- Connexion client

Answer

You can use Connexion's automatic stamp functionality to apply your holding code's value to the label.

1. In Connexion client, go to Tools > Options.
2. Under the Printing tab, select Label Printing Options.
3. Click Define Automatic Stamps.
4. Enter the holding code value in the first field.
5. Choose to Assign automatic stamp to holding library code. Enter the value again in the field under this option.
6. Click Add. The holding code will appear under Automatic Stamps Defined.
