I am getting a script error in ILLiad showing ssl.gstatic.com when connecting to Docline

Last updated: Fri, 19 Feb 2021 14:53:28 GMT

Symptom

- You are connecting to Docline in ILLiad and getting an error message showing ssl.gstatic.com

Applies to

- ILLiad

Resolution

There are two different Documents that ATLAS has about this issue and how to resolve it:

1. Here is one for Docline Log-In Methods.
2. And this one for Switching to a Non-Google Authentication Provider.

Additional information

The Google auth issue seems to pop up in two different ways:

1. Saying the browser is insecure.
2. Having some of the Google authentication javascript errors popping up that still wouldn't allow login and ultimately results in the insecure browser warnings.
