How does ILS circulation integration work in MuseumKey or LendingKey?

Applies to

- MuseumKey
- LendingKey

Answer

Once this feature is configured, you may check items associated with reservations in and out in the staff console. In addition to being marked as checked out in MuseumKey & LendingKey, the system will trigger a check in/out command to your ILS.

As MuseumKey & LendingKey creates reservations based on its own loan periods, it cannot consider any ILS circulation rules, such as loan periods or renewals. We suggest the loan period you add in MuseumKey & LendingKey match your circulation rule as closely as possible.
