How do I "comment out" a stanza in EZproxy?

Symptom

- You want to remove a stanza, but you do not want to delete it, so you need to know how to "comment out" a stanza

Applies to

- EZproxy

Resolution

If you are in the config.txt and editing it, here are the steps to "comment out" a stanza:

1. To "comment out" a stanza is to put a pound sign in front of each line of the stanza.
2. So if a stanza has:

   T ABC123
   U https://www.abc123.com
   HJ www.abc123.com
   DJ abc123.com

   Then put a pound sign (#) in front of each line so it looks like:

   #T ABC123
   #U https://www.abc123.com
   #HJ www.abc123.com
   #DJ abc123.com

EZproxy will not read the lines.
