• Authority records

No image available

Record Manager supports the following authority records: Art & Architecture Thesaurus (AAT), Candiana, Library of Congress, Medical Subject Headings (MeSH), Dutch (NTA), Māori, and German (GND).

• Work with authority records
• Export authority records
• Record Manager Authorities Guide
• Keyboard shortcuts for authority records

• Bibliographic records

No image available

Record Manager allows you to create new and enrich existing items in WorldCat using either a MARC 21 editor or a Text View editor.

• MARC 21 view
• Export MARC 21 records
• Text view
• Bulk actions

• Constant data

No image available

With Record Manager, create constant data records for bibliographic and local holdings records to develop and maintain standards for use in all bibliographic or local holdings records, certain collections, or specific types of resources.

• Bibliographic
• Local holdings records

• Field strings

No image available

When you are editing a MARC 21 WorldCat record or LBD information, you can save frequently used variable field information as a string that can be copied to other fields.

• Create a field string
- Delete a field string
- Edit a field string
- Insert information into a field with a field string
- Save field information as a field string
- View the field strings library

- My Labels

  No image available

  You can create spine labels from information in an MARC 21 WorldCat bibliographic record or a local holdings records. Your list of labels is only viewable by you and not by other users in your institution.

  - About My Labels
  - Label Print Lists
  - Label Templates

- Local bibliographic data

  No image available

  Using local bibliographic data (LBD), you can add local information to a bibliographic record that is specific to your institution’s title; however, other institutions will not be able to see that information in the MARC 21 WorldCat record and your users will only see your institution’s LBD.

  - Bulk actions for local bibliographic data
  - Work with local bibliographic data

- Local holdings records

  No image available

  Using Record Manager, you can create and edit WorldCat local holdings records (LHRs). LHRs provide information about your item-specific holdings as well as lending and reproduction policies.

  - Bulk actions for local holdings records
  - Work with local holdings records

- Text strings

  No image available

  When you are editing a MARC 21 WorldCat record or local bibliographic data information, you can save frequently used variable information as a string that can be copied to other fields.

- How do we delete holdings for a closed library?
- How do we get our records into WorldCat?
- How to format six by six labels on one page in WMS Record Manager
- How to remove duplicate item barcodes safely
- How to resolve printer label creep?
- How to restore an item that was accidentally withdrawn
- If I start a record in Record Manager, can I finish editing it in Connexion browser or Connexion?
- Is it possible to create a local holdings record without setting holdings on a record?
Is it possible to undo a bulk action?
◦ Is it possible to undo a merge of inappropriately merged records?
◦ Is there a way to limit search results by year?
◦ I am creating a Catalogue for an Oral History sound recording but the Literary Text Code cannot be entered
◦ I am getting an error message when I try to edit a record in the bibliographic saved in-progress file
◦ I am getting an error message when I try to search for records in the bibliographic saved in-progress file
◦ I am getting an error message when trying to save a derived LHR.
◦ I cannot submit a Record Change Request. What should I do?
◦ I can't update a bibliographic record.
◦ I have had problems using the WorldCat Bibliographic and Authority Record Change Request form to report duplicate errors.
◦ I have run into mass validation errors working in the Record Work Lists in Record Manager, is there a way to bulk fix validation errors?
◦ I keep getting a Bib Read Failed Unexpectedly. How can I fix it?
◦ I need our authorization number for Sirsi Dynix's SMARTport. How do I get those credentials?
◦ I need the authorities roles added to my WorldShare account
◦ I would like to add a new name authority record to the LC authority file. How do I do that?
◦ Left hand navigation drop-downs overflow into the main display in Record Manager
◦ My Online record displays in WorldCat Discovery as Print. How can I resolve this problem?
◦ The Label Print List is showing two labels for each record
◦ The LHR display in Record Manager is not displaying the item's ILL lending status.
◦ The same record is displaying twice in WorldShare Record Manager
◦ We deleted LHRs. This action removed holdings from our collection even though we have holdings set on the titles in the Knowledge Base.
◦ We just created a new record for issues of a journal. When we try to edit the items a server error pops up.
◦ What are the OCLC cataloging rules for full-level records related to ELvl "M" and local data?
◦ What does the bulk LHR edit error "Not Updated - Missing Summary" mean?
◦ When editing the Item Details of a Local Holding Record I get an error in relation to not being able to find the specified holding item
◦ When I click on the print button to print my labels, nothing happens.
◦ When I create a new LHR using the Derive option, information that I do not want is brought over from the Bib
◦ When I try to edit a bib, I get an "unauthorized" message. Is there a reason I can't fix this record?
◦ Where is the control number in an LBD record?
◦ Why am I getting a validation error on the 040 tag?
◦ Why am I seeing the wrong Local holding code come up in the 049 tag in Record Manager?
◦ Why are duplicate records appearing in the Discover Items search?
◦ Why can't other users at my library see the label templates I created?
Why can I not see the Customize Scripts tab in Record Manager?

- Why does an item have a shelving location that does not exist on our Holding Codes & Translation Table?
- Why do I see a second copy prefix in my LHR display in Record Manager?
- Why is my Holding Code changing when I derive a record?
- Why is our holding code reading as invalid in the 852 $b field of an LHR?
- Why is there no shelf location and call number displaying for an item I hold?
- Why is the publication information not populating in my record when I switch from MARC 21 view to Text View?
- Will batch deleting a merged OCN that is now in the 019 tag delete my holding on the record that was kept
- Will my user preferences from Connexion Browser automatically carry over to Record Manager?
