Learn more in a training course: Collection Manager: What it is and why it matters

- **Knowledge base collections**
  - No image available
  Use Collection Manager to manage your electronic resources and automatically maintain WorldCat holdings. Use your collection data with other OCLC services, display full-text links, and get WorldCat records.
  - About knowledge base collections in Collection Manager
  - Choose a method to add or create a knowledge base collection
  - Configure institution settings
  - Get WorldCat MARC records for knowledge base collections
  - Use collection data with other services
  - Maintain your knowledge base collections
  - Cooperative management

- **Query collections**
  - No image available
  Use Collection Manager to improve local catalog quality with a set of WorldCat MARC records. Create a query collection for electronic and print serials, new titles added with CONTENTdm, or to create a spreadsheet of your WorldCat holdings.
  - About query collections in Collection Manager
  - Create a query collection
  - Create a query collection to get a spreadsheet of your holdings
  - Create a query collection to get records for CONTENTdm and Digital Collection Gateway titles

- **Cataloging partner collections**
  - No image available
  Use Collection Manager to get new print materials into circulation quickly. Ask your provider to send OCLC your
electronic order information. Create a cataloging partner collection to set WorldCat holdings and get book spine labels and WorldCat MARC records that include your provider data.

- About cataloging partner collections in Collection Manager
- Create a cataloging partner collection

**Data sync collections**

No image available

Use Collection Manager to synchronize your catalog with WorldCat. Create a data sync collection to maintain your holdings, local bibliographic data, and local holdings records in WorldCat. Match brief records in your local system to current WorldCat records to get a more complete representation of your holdings.

- About data sync collections in Collection Manager
- Prepare your data
- Create a bibliographic collection for a reclamation
- Create an ongoing data sync collection
- Reference

**WorldCat updates**

No image available

Use Collection Manager to keep your WorldCat MARC records up-to-date. Enable WorldCat updates to automatically receive updated MARC records for your holdings in WorldCat as master records are enhanced.

- About WorldCat updates through Collection Manager
- Enable WorldCat updates

**Use Collection Manager with a CatExpress subscription or without a subscription**

No image available

Collection Manager is part of the value of your OCLC Cataloging and Metadata Subscription or your CatExpress subscription. Libraries without a cataloging subscription can get records for collections from selective providers.

- Options for libraries with a CatExpress subscription
- Options for libraries without a cataloging subscription

**Use Collection Manager for content from a specific provider**

No image available

If your interest in content from a specific provider has lead you to Collection Manager, see a list of providers and provider-specific workflows. The instructions will guide you to get WorldCat records, holdings, and/or full-text links for content from your providers.
